

**ANNOUNCING...**

## **GEODECISIONS SELECTED BY ODOT**

GeoDecisions, a leader in providing spatial solutions to the transportation industry, today announced that it has been selected to provide Oklahoma Department of Transportation (ODOT) with a GIS-enabled Intranet application for accessing enterprise transportation information. This \$1.9M Geographical Resource Intranet Portal (GRIP) project will span the next three years and will phase in data from ODOT's many divisions.

The GRIP application will utilize state-of-the-art technology to assist ODOT in managing its current investments and in making more strategic decisions about the best ways to maintain and improve Oklahoma's transportation network. GeoDecisions and its teaming partner, TransDecisions, will work with ODOT to plan, design, develop and implement GRIP. The application will utilize Intergraph's GIS web tools and Oracle database products.

# COMPANY PROFILES

## **GeoDecisions**

GeoDecisions, a division of Gannett Fleming, provides consulting services to the spatial IT industry. The firm combines comprehensive technology capabilities with innovative ideas to meet its clients needs. This is accomplished by leveraging spatial information as a key to empowering existing business operations and to enhancing decision making.

GeoDecisions was founded in 1986 and began operating as a division of Gannett Fleming in January 1997. Gannett Fleming maintains its corporate headquarters in Harrisburg, Pennsylvania; however, there are more than 40 offices throughout the world. For more information on GeoDecisions and Gannett Fleming, please visit [www.geodecisions.com](http://www.geodecisions.com) and [www.gannettfleming.com](http://www.gannettfleming.com).

## **TransDecisions**

TransDecisions Inc. is an exciting new organization dedicated to providing LRS and routing solutions to corporations and governments. TransDecisions is a software application provider for enterprise and Internet computing needs. The solutions the firm provides combine the best spatial information management technologies with state-of-the-art transportation management and decision analysis software. For more information on TransDecisions, please visit [www.transdecisions.com](http://www.transdecisions.com).

## **Oklahoma Department of Transportation**

ODOT is responsible for planning the state's transportation system of services and infrastructure, for building and maintaining Oklahoma's network of highways and bridges, and for providing technical and financial support to local governments' transportation initiatives throughout the state. A safe and efficient transportation system is critical to the state's economic development and to the vibrancy of Oklahoma's business, social, and cultural life. The work of preparing Oklahoma's transportation system to meet the needs of this century is of central importance to the state's future.
